

## CSE 106 – Lab 2

Without the use of external libraries (you'll get to use these later, but just not right now), build a static webpage on an appropriate topic of your choice with the following requirements:

1. Have at least 4 pages, one of which will be the home page that has navigation bar to the additional 3+ pages
2. Include an external CSS page that defines your styling for at least
  - a. Background color or image
  - b. Text color
  - c. Font
  - d. Font size
  - e. Text alignment
  - f. Margins and padding
3. Include one table that is formatted with a border, margins and padding in your CSS file
4. Include one list that is formatted in your CSS file
5. Include headings, paragraphs, and images on every page formatted in your CSS file
6. Include at least one video on one of the pages

If you are drawing a blank, here are some topics you could pick for your webpage:

- Dogs
- Cats
- Chickens
- Vegetables
- Fruit
- Trucks
- Motorcycles
- Bicycles
- Python
- HTML/CSS
- Guitars
- Climbing
- Books
- Etc.
